

PRESS RELEASE

The Town Council has expressed its utmost concern about this application. This was not only because of the fact that the proposal will mean another 400+ houses just outside the Town's boundaries, but also because of the link road. This new road is proposed to join into Lower Earley Way between the Loddon Bridge and Sindlesham Mill roundabouts, and will be built across the floodplain of the River Loddon.

Councillors felt that not only would this further increase the congestion already experienced at these two junctions, but may also exacerbate the flooding in the Sindlesham Mill area.

The Borough Council has been asked to refuse this application.
